£69,000

Specification

Year	1985	Mileage	92,000 Miles
Engine Capacity	3.5 litre	Transmission	Manual
Exterior Colour	Zinnober Red	Interior Colour	Pearl Beige
Leather			

Grace, pace and plenty of go, M-Power at its most elegant...rare too.

Just 524 right hand drive examples were produced between 1985/89. The Motorsport version of the already highly successful 635 CSi benefitted from the 24 valve, twin cam engine initially developed for the M1, 5 speed Getrag sport gearbox, Motorsport springs and roll bars blended with Bilstein Sport dampers, larger 4 pot front brakes, larger wheels and limited slip differential. Unique amongst sports coupes, the M635 offers an unrivalled blend of exclusivity, build quality, practicality and performance. Four 'proper' seats, a commodious boot and a lavish array of creature comforts provide the practicality whilst the much revered, 286bhp, M88 engine delivers the excitement.

This sporting thoroughbred will sprint to 60mph in six seconds and, in an awesome display of torque, pulls cleanly and increasingly rapidly from 25mph to 158mph in fifth gear. Overtaking ability is equally impressive with the dash from 30-70mph taking just 5.5 seconds. The M635 must surely rank as the ultimate workaday supercar – blindingly quick and satisfying on the twisty bits, effortlessly refined as a motorway mile-eater, and uncomplainingly efficient when tottering to Tesco's.

This particular M635 CSI is very well known to Classic Heroes and a regular visitor for both routine maintenance and preventive future proofing. We have cared for the car for the last 15 years and sold it to the last three owners. It's rather lovely that those owners are all still customers and often meet up here with their next Classic Hero and reminisce about this lovely M635 CSI.

The history file and documents clearly show how loved this M635 has been throughout its life, with those owners clearly understanding that the best form of maintenance for any classic car, is preventive maintenance. In recent years, on top of the more routine service maintenance, the car has benefitted from the following work carried out here at Classic Heroes.

Complete engine strip, inspection, and re-assembly with new timing chain, oil pump chain, big-end shells, tensioners, guide rails, sprockets, valve stem oil seals, engine gaskets, oil seals, O rings and head-gasket.

Our Upgraded Brembo front brake conversion

Stainless steel exhaust

Fuel hoses

Coolant hoses

Battery

Gearbox rebuild

Complete clutch

Gear-lever bushes

New sunroof panel
