BMW 635 CSI HIGHLINE

£34,995

Specification

YEAR	1990	MILEAGE	26,000
ENGINE CAPACITY	3430cc	TRANSMISSION	AUTOMATIC
EXTERIOR COLOUR	CIRRUS BLUE	INTERIOR COLOUR	FULL BLACK LEATHER
SERVICE HISTORY	FULL HISTORY		

The designation "Highline" introduced by BMW during 1987, even by 1980s extravagance, could not be exaggerated. It took BMW's awesome, high performance flagship GT car to new heights in luxury. Every possible part of the interior was trimmed in BMW's highest specification of leather. The headlining, sun visors, pillars, rear parcel shelf, complete dashboard, glovebox, undertrays, centre console sections, seats, armrests, side trims and door panels were all trimmed in beautifully stitched Nappa leather. The cosmetics were lifted to new levels with a redesigned gear knob, ellipsoid headlights and fog lights, new front spoiler and redesigned colour coded bumpers.

The Highline was a massive success for BMW and ensured sales of the now long running E24 continued with strength right to the end of production of both the 635 and the M635 CSI.

The current owner asked us to source him the best possible 635 CSI we could. He had recently retired and wanted a classic GT car with utter usability and reliability. We viewed and rejected many cars before we found this splendid example. The car was transported to us to carry out pre-purchase due diligence by our workshop team. The green light was given to go ahead with the purchase of this exceptionally low mileage and original 635 CSI Highline.

Headlight wash-wipe
Rear headrests

The workshop carried out an appraisal of this car for the current owner 5 years ago. The instruction to us was simple. The car must be perfect, want for nothing and furthermore, be fully future proofed both mechanically and bodily. The car was to be 100% turnkey and usable for European road trips. The following was carried out.

Inspection II service, new belts, new brake fluid and coolant, new door catch grommets, new fuel tank, new fuel hoses, new tyres, new BBS 17" split rim wheels (original TRX wheels are supplied with the car), new seat switches, new exhaust rubbers, new trims as required, new upper tie bar suspension bushes, new fog light, new first aid kit, new rear light lenses, new rear exhaust box, new floor mats, new roll bar links and the body shell carefully cleaned, inspected and treated with clear cavity wax.

The car will be handed over with all the original handbooks, manuals, fully stamped service book, all original tools and spare keys.

The workshop team will take the car through the workshop for full service, new brake fluid, new coolant, PDI, air condition service and new MOT prior to collection by the new owner.

Please enquire with Barney for full details of this 635 CSI Highline.
