We are thrilled to announce that your purchase of this lovely Boxster will be doing some real good. At the owner's request, every penny of the sale proceeds will be donated to Cancer Research. This is something we at Classic Heroes are thrilled to be helping with.

There is no doubt that the creation of the Boxster took the already mega Porsche brand to a new level and audience. The Boxster did for Germany what the MX5 did for Japan. Cost versus brand, nothing comes close like a Boxster.

The Boxster S with its 3.2 litre, flat six motor ensured that all important Porsche sound and packed high levels of torque with a healthy 276 bhp. The 987 mid-engine layout gave balance and an exciting power to weight ratio so suited to our UK roads. This package gave delightful handling with a forgiving characteristic blended with utter usability and affordable running costs.

What beats a Boxster S for costs, versus, performance and usability? This excellent mix of talents has made the Boxster a victim of its own success with many having now covered high mileage with the wrong type of owner.

It has become increasingly tricky to find any Boxster that still has the sort of integrity shown by this example. One owner from new, only 44,000 miles, garaged from new, 100% full-service history and a supporting document file containing every single invoice from new including the original order and invoice for the car.
